

# HELP

If our site is not displayed correctly on your screen it could be because of your browser version.

Sometimes an earlier version does not always display objects adequately: some boxes will be placed randomly too low on the screen or too far to the right, etc.

There are several browsers on the market. Download the one which suits you best.

Some examples:

**FIREFOX** (free) for PC/Mac/Linux (secure, meets web standards)

Download from:

<http://www.mozilla-europe.org/fr/firefox/>

**INTERNET EXPLORER**

Download from:

<http://www.microsoft.com/france/windows/downloads/ie/getitnow.msp>
